Information on Research Students	Many International Students enroll from six months to one year as "research students." Some graduate schools recommend doing this as a precursor to their graduate programs to allow students to settle into their research environments with ease. As with post-graduate students, research students receive guidance from a supervisor in their field of speciality but they cannot receive credits and do not obtain any formal qualification.

For information on tuition fees, examination fees, and entrance fees, please see page 4. For information on scholarships, please see page 11.

# Apply to the graduate school

Check how to apply on the website of the graduate school you wish to enter. Applicants must pay the examination fee at the time of application.

# Take the entrance examination

Screening procedures for research students are conducted on the basis of documentation submitted whilst screening procedures for graduate level students differ between each school. Please check the website of the school you wish to enter. In the event that you are required to come to Japan for the entrance examination, you will need to obtain a temporary stay visa at your local Japanese Embassy.

# Commence enrolment procedures
