

DR. GRAHAM EMSLIE

特別講演 児童思春期精神医学講座

The University of Texas Southwestern Medical Center
Professor of Psychiatry with Tenure and Pediatrics
Director Division of Child and Adolescent Psychiatry

Lecture 1

Childhood Depression: Research to Practice

This presentation will review the data on assessment and treatment interventions for youth with depression, with an emphasis on applying research findings to clinical practice.

Lecture 2

Methodology of Clinical Trials in Pediatric Depression

This presentation will review methodological considerations in clinical trials in pediatric depression. Following a description of the common methodologies in previous trials, the strengths and weaknesses of these trials will be reviewed, with an emphasis on factors such as site selection, recruitment, inclusion/exclusion criteria, and outcomes. The presentation will wrap up with alternative study designs that could be considered for assessing medication efficacy and safety.
