War II, its completion was delayed until 1960.

This building is often featured in University brochures as the representative building of Hokkaido University. Construction began 1935, but because of World War II, its completion was delayed until 1960.

Opening hours: 10:00-17:00 (Fridays June-October 10:00-21:00)  
 Closed: Mondays, December 28-January 4  
 When a national holiday falls on a Monday, the Museum will be open that day and closed the following day.  
 Museum may be irregularly closed for maintenance, etc. Please check the museum's website (<https://www.museum.hokudai.ac.jp/english/>) for further information.

With a cafe, museum shop, and a multipurpose space, students, teaching staff and local citizens alike can enjoy the museum more than ever.

The Museum was established in April 1999 to collect scientifically significant specimens and historic documents gathered across the University and to offer educational programs to students and the public. Over 4 million biological, geological, archaeological, and historic specimens are housed in this former science building.

This important cultural property was built in 1877, based on Dr. Clark's belief that successful farming depended on spacious stables to shelter animals from the severe winter. The barn was one of 9 buildings, including a silo, bull-house, milking shed, and tool shed - all built in the style of 19th century American barns. The buildings were relocated to their present site in 1910, and extensive restoration was carried out between 1977 and 1979.

Completed in 1909 the historical Furukawa Hall is a splendid example of French Renaissance style architecture in Japan. Now registered as a national monument, the main roof and dormer windows on each wing along with the centered semi-circular arch window and turret display an elegance rarely seen on the streetscapes of contemporary Japan.

Maintained by the School of Agriculture, the Botanic Garden was established in 1886 and is the oldest and second largest of this type in Japan. Today, it contains over 4,000 plant varieties including a diverse range of alpine species. Within the garden, there is a museum housing Ainu artifacts and many biological specimens. With such a central location, the garden is well worth a visit.

During the winter months, only the greenhouse remains open. Please check the botanic garden's website ([https://www.hokudai.ac.jp/sc/bg/index\\_c.html](https://www.hokudai.ac.jp/sc/bg/index_c.html)) for further information.

Located about a 10min walk from Sapporo station, the grand 4.5-metre high granite clad pillars of the Main Gate have stood since 1939. Whilst being one of many entry points onto the campus, it is the main gate which welcomes hundreds of tourists each and every day.

Built in 1985, Hokkaido University's Conference Hall is our principal venue for national and international academic exchange. The Hall is used for academic activities such as lectures, study meetings, seminars, conferences, and ceremonies.

Opened in 1960, this building was designed to be a place serving students and today contains various student related support centers as well as a cafeteria.

Built in 1977, the Centennial Hall houses an exhibition of 100 years of University history in the form of photographs and documents. Conference rooms provide venues for both faculty and alumni gatherings.

From the North 13 Gate westbound, lie 70 mature ginkgo trees along a 380m stretch of road. At the end of October each year scores of tourists come to see their brilliant orange hue as they drop their autumn leaves and ginkgo nuts as they ready for winter.

From the northern area of campus is home to a 300m stand of seventy stately poplar trees which were planted in October 2000 to commemorate the 125th anniversary of the establishment of Hokkaido University.

The Institute for International Education and Research provides support services to international students and researchers in the form of professional counseling, Japanese Language instruction, and other essential services such as the use of outdoor patio to meet friends and relax.

On the western side of the Central Road between the Graduate School of Engineering and Faculty House Trillium, lies Ono Pond. This small pond is beautiful all year round, but particularly stunning to see in summer with its ample bird life, and in autumn with the changing of the leaves.

This center opened in May 1995 as a place for academic staff to meet in an informal atmosphere to promote education and research activities, staff welfare, and community. It contains conference rooms, the Restaurant Elm, a lounge, and a gallery.

On this area of the campus in 1936, Dr. Ukihiro Nakaya successfully produced the world's first artificial snow crystal. This discovery brought him the Japan Academy Prize, and helped pave the way for the establishment of Hokkaido University's renowned Institute of Low Temperature Science.

Now registered as a national monument, the main roof and dormer windows on each wing along with the centered semi-circular arch window and turret display an elegance rarely seen on the streetscapes of contemporary Japan.

The bust of the famous founding father of the University, Dr. W. S. Clark can be found on the north-western corner of the Central Lawn. The current bust is a close replica of the one produced for Hokkaido University's 50th anniversary in 1926. Unfortunately, the original was melted down during WWII but 5 years later, a project to recreate the original was commissioned.

The Enyu Gakusha was built in order to facilitate interaction between the University and the local community through holding discourse and hosting events such as meetings, seminars, concerts, and parties.

In the 9th and 10th centuries a village was located in this area where people lived in pit dwellings and used Satsumon-style earthenware, a particular type found only in Hokkaido. About 30 examples of pit dwellings are preserved on this valuable site.

The northern area of campus is home to a 300m stand of seventy stately poplar trees which were planted in October 2000 to commemorate the 125th anniversary of the establishment of Hokkaido University.

The Institute for International Education and Research provides support services to international students and researchers in the form of professional counseling, Japanese Language instruction, and other essential services such as the use of outdoor patio to meet friends and relax.
