

Hokkaido University & The University of Melbourne Case Study Afternoon

Snapshots from Australia and Japan

Integrated Allied Healthcare for Older Adults

Friday 16 September 2022

12:30–16:00 (JST) / 13:30–17:00 (AEST)

Moderator: Daisuke Sawamura, Faculty of Health Sciences, HU

Marianne Coleman, Faculty of Medicine, Dentistry and Health Sciences, UoM

Clinicians, Educators, Researchers, Students and the Public all welcome

This online case study afternoon will highlight and celebrate the role of allied health professionals in Australia and Japan, supporting older adults at home, in hospital, and residential care.

Older adults have complex health needs that could be addressed by integrated care systems, but how is this implemented in practice? Our medical and allied health speakers will share examples of interprofessional working to deliver integrated healthcare for older adults in urban and rural areas, highlighting both challenges and future directions for multidisciplinary care.

Why should I attend?

Build your interprofessional knowledge and practice

Hear about Australian and Japanese health systems and care models

Celebrate multidisciplinary care to support ageing in place

Take part in our Audience Q&A and share your views/experiences

Hokkaido University and The University of Melbourne are pleased to announce this case study afternoon, part of our Joint Workshop series. These events aim to strengthen collaboration between healthcare research, education and practice, and deepen understanding between various allied health disciplines of our combined roles in patient care. The events are directed to clinicians, researchers, educators, students and those involved in allied health and ageing.
